Almost 2000 years ago, during The Dragon Dynasty, an unstoppable ancient Curse fell over The beautiful Princess Fei Yan. Her Soul risks to remain trapped in Time for decades, hundreds or even thousands of years, but young General Lai Ji vows to protect her with the Price of his Life. Along with Ju, The-Left-Handed-with-the-Right-Punch - and Lu Lu, a young girl thief, they travel together a long way to The Empire frontier.

In Hong Kong, 2015, Agents Eddy, Leo and Fei discover the secrets of The Triads. The Police Chief, who took the blame for losing his first group of Agents in the past, then decides to start the mission again after 20 years, counting on the good skills of his young Agent, Eddy. The young pickpocket Li Li joins the team, becoming a skillful Agent. Following KB's trail, Eddy meets Tiger in the secret basements of The Mobster's building, risking to repeat the tragedy that happened 20 years ago, to the mission that was unmasked by KB.

The two parallel Worlds start to overlap when The Potion of Time comes back to Life. The Agents discover the possibility of reincarnation but without caring too much about this matter. While Eddy risks to disappear without a trace in The World of Triads, The Princess again takes hold of The Young General's hand, who wandered thousands of years waiting for her.
